

## UNIVERSAL SMART HOME PLATFORM

A white label solution for smart home services, specifically developed for telecom operators and service providers.

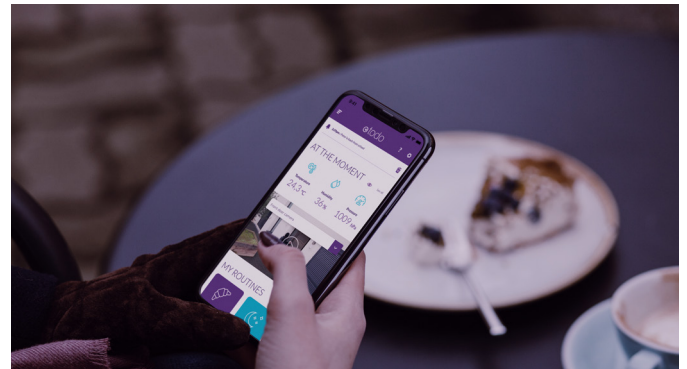

# OTODO ONE, A TAILOR-MADE SOLUTION

Otodo Hub

**The Otodo multi-protocol Hub** communicates by Wi-Fi with your internet router. It lets you manage and set up most commercial connected objects, as well as older remote-controlled devices from different brands.

- Very cost effective
- Quad band antennas: RF 433/868-915 MHz , BLE, Zigbee 3, Z-Wave, Wi-Fi
- Hardware integration possibilities into third-party products

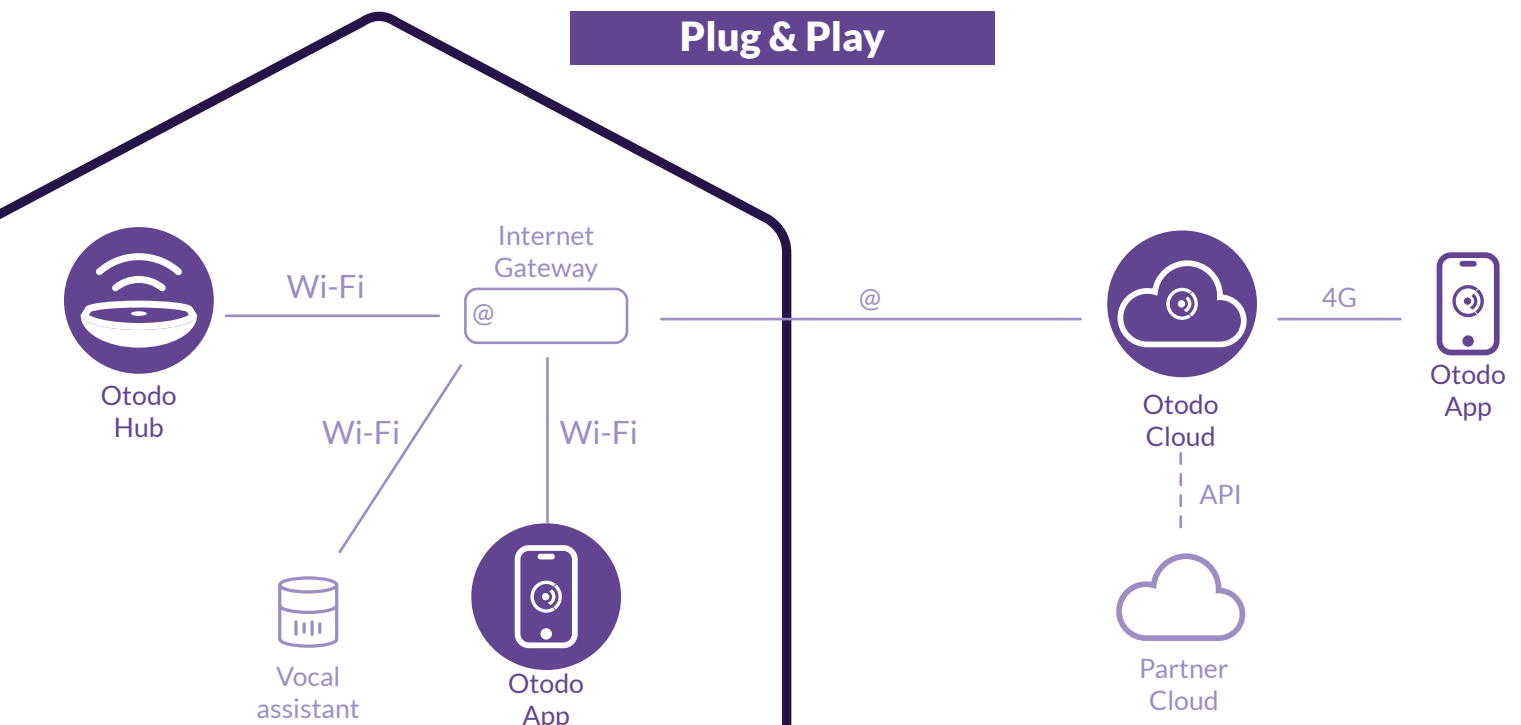

Otodo App

**The Otodo mobile** app unifies all mobile apps and remote controls. It allows you to monitor and control all your devices, to set up some scenarios with a few clicks, and also to receive notifications and alerts.

- iOS, Android
- Voice interaction enabled
- Graphic design customization possibilities or SDK availability for easy integration into third-party mobile App

## Plug & Play

# WITH A SEAMLESS USER EXPERIENCE

## Easy configuration

- Automatic discovery of devices
- Smart pairing capabilities

## Endless interactions possibilities

The Otodo One solution **enhances Smart Home experience** by multiplying interaction possibilities :

Mobile  
App

Vocal  
Assistants

Connected  
buttons

### Otodo Voice Control :

The Otodo platform is compatible with the major voice assistants. Thanks to **a single skill "Otodo"**, the user can control by voice all the devices connected to the Otodo platform.

works with the  
Google Assistant

works with alexa

In addition, a proprietary NLP (Natural Language Processor) enables voice interaction with others devices.

## Services on demand

- Add intelligence to connected objects already installed in your home
- Based on pre-programmed scenarios
- Fully customizable

Security  
monitoring

Comfort &  
convenience

Energy  
management

Home  
appliances

Entertainment
